From the Editor's Desk

Hi everyone,

Did you get to go to the Yuma Hamfest? Haven't heard any reports on it yet. Unfortunately, I wasn't able to go again this year so I'm depending upon the readers to let us know how it was. Drop me a note at the ADAW email address - adawaz@arca-az.org - with your "take" on the event. It doesn't have to be a long story, just a few lines about what you thought of the hamfest.

Next up is SpringFest at the Fort McDowell Casino on March 13. This one is going to be great! A "Garage Sale" flea market is also being held at the casino on the same date, so the crowds should be exceptional. Have you seen the commercials that the casino is running about it? It sure is a great way to get the word out. There's a flyer attached to the email version of ADAW. If you want more information, you can visit Scottsdale Amateur Radio Clubs web site at www.scottsdaleamateurradioclub.ning.com.

The Arizona Amateur Radio Club hamfest will be held on April 10 at DeVry University. The club does a wonderful job putting on this event and has their fingers crossed that there won't be any rain this year. Come on out and enjoy the morning browsing through all the treasures that are sure to be there.

Plans are already underway for the 2012 ARRL Southwestern Division Convention which is slated to be held in Arizona. Several venues are currently being investigated for the convention. If you know of a site that might be able to offer the amenities necessary for this event, please let Tom Fagan, K7DF (ARRL Arizona Section Manager) know. You can email Tom at k7df@arrl.org or k7df_tom@yahoo.com.

Enjoy our nice spring weather. See you next month.

73,
Chris, N7PVL

LICENSE TESTING INFORMATION

When you are ready to take an exam for an Amateur Radio license, there are Volunteer Examiners available to assist you. Each Applicant will need to bring a picture ID (some test sessions require two forms of identification). If you are upgrading your class of license, be sure to bring the original (and a copy) of your license and/or Certificate of Successful Completion of Examination (C.S.C.E.). There may be a fee required.

PLEASE NOTE: Dates, times, or locations may change. Call test session contact to confirm information. Walk-ins are permitted unless otherwise specified.

MARCH TEST SESSIONS

Hi Guys,

I don't know about you, but I enjoy a rainy day once in a while. And we have had a few lately that are making my lawn grow a fresh crop of weeds. After last year with only 3 inches of rain we can sure use whatever we can get. As long as it doesn't rain on our hamfest, it is OK with me.

Speaking about weather, we sure had a great program at the February club meeting. Rick Aldom W7STS, presented us with an in depth study on viewing the weather data feed from sites like wunderground.com. That was very informative and if you missed it, you missed a great one.

The program for the March 3rd meeting will be by Clark Jones, KI7TU, on solar power. This should be another super program. I am interested in solar power for my station as well as for my RV. Since we live in an area that receives strong sun light most of the year, it only makes sense to utilize it as much as possible. I am looking forward to this program.

On March 13, 2010, we will have the Spring Hamfest at the Fort McDowell Casino. There is going to be a Yard Sale at the same time in the adjacent parking lots. Last year that Yard Sale drew a large number of buyers and this year it should be even larger. So, make your plans to attend and do some selling or some buying. There will be plenty of food available. The Casino is going to have the food concession with full breakfast available. The club will be having a raffle with an HF radio as grand prize. We will also have some HTs and antennas as prizes. There will be hourly prizes too. The actual prizes have not been selected as yet, but they will be something every Ham can use.

I have been cleaning up my travel trailer so we can go to the Yuma Hamfest on February 19. We are planning to go over on Friday and return on Sunday. They always have a good program with seminars and of course, a swap meet. Their swap meet is small, but fun to attend. They also have some great raffle prizes. Last year we got to most of the hamfests in the state and we are going to do that again this year. We like to go camping whenever we can get away from work, and playing radio along the way is great.

I have a project in Payson so I was up there on February 8th. Looking to the rim country from Payson is spectacular. It looks like Colorado with all of the snow on the rim and distant mountains. I don't remember ever seeing it look quite like that. I don't like the cold any more so we have not gone to Show Low, but I bet it looks like a Winter Wonderland. And seeing the heavy snow in the East reminds me of why we moved here 36 years ago. You just can't beat our weather here

in the valley.

Having said that, I must tell you, the reason we like to go camping in the summer is to enjoy the cooler temperatures of the high country. I don't mind the 110 degree temperatures here, but it is sooo much nicer in the pine trees at 70 degrees. We can go fishing and play radio in the pines, but first we need to take care of business here in town. Too bad. Maybe I should retire. Ha!

Dreux KB8YYA, has our repeaters both up and running great. He is also net control for the club Tuesday Night Net. So if you are not watching TV at 7:00 P.M. on Tuesday evening, turn on your 2-meter radio to 147.18 or your 440 to 440.00 and check in. We are interested in how far out the repeaters reach. We have had guys check in from as far south as Maricopa. This is a general conversation net, but you can just check in and out with no traffic if you prefer. Dreux does have some good questions and what Ham does not like to talk on the radio!

Last December, we joined the MARCA club for our annual Christmas banquet at Scottsdale Community College Culinary Arts dining facilities. We had a great time together and we will be doing it again this year. You can see pictures taken at this event on our web site. The annual Christmas Party Banquet this year will be on December 1, 2010 at SCC Culinary Arts dining room. I know it is a long way off, but mark your calendar.

Well, that's all I have for now, so keep on Hamming.

enickerson427@aol.com

SARC CONSTANTS:

SARC is a 501 (c)-3 club. That means all donations are fully tax deductible. Contact Paul Finnell, W7EFQ at 602.998.7024 for information on estate donations and equipment pick-up.

For membership information, call Tom Barry, W7UF at 480.998.8494. Please send address change requests to Tom no later than the 7th of the month in which you would like the change to occur.

To field check QSL cards for most ARRL awards, call Nick Sues, W7ZMD at 602.992.4133.

You may recall that our February column revealed little-known information about several members of the Arizona Amateur Radio Club. There were enough hidden skeletons to fill two columns, so this March issue features Part II of members' secrets buried in the past.

Several of our AARC members have sailed the deep blue seas, but not on luxury cruises. Joe Cutitta, W0SLI, spent his cruise time with the Marines, while Jerry Weikert, WB7CLL, during his Navy tour of duty spent some time beneath the surface on a submarine. One of George Cooney's jobs while serving time on the island of Adak in the Aleutians with the Navy in 1951-52 was to copy the daily news from Reuters Press using CW, and it was transmitted at a speed of 44 WPM. According to George (KQ7C), he and all of the sailors who copied the news got so good at it that they could listen to recorded music in one ear and code in the other and still get solid copy. The photo of George was taken near a window in the hall of his living quarters at Adak, and the photo of the snow-covered buses was taken just outside that same window. I wouldn't call this a tropical paradise.

Linda Sitterley, W7POF (Bob's wife), was shifty about disclosing her new license about three years ago. Her late sister Vickie, KC7PHY, didn't know that Linda had taken the test, and as soon as Linda got her new call, KE7HWB, she called her sister on the repeater several times before Vickie finally answered with "Who is this?" What a total surprise it was to Vickie to hear Linda on the air!

Steve Tolnai, W7WSV, has been a ham for a long time. In fact, he was first licensed in 1954 and was the youngest ham in AARC at that time. But Steve also has a deep interest in music. He started playing guitar at age ten and later played violin, banjo, and bass in high school, playing in symphony orchestra, dance bands, and various groups from country to big band. He also called and taught square dancing from 1965 until the early seventies.

Janice Hodges, xyl of Bob Hodges, K7JJT, tells me about the first rig that Bob built. It was a Heathkit Apache, and it was built in their bedroom. Moving a table that was suitable for the construction project into the room necessitated cutting away part of the door. The entire construction was especially overwhelming to their young daughter who was afraid the parts she saw would never find their right place in the Apache. Upon completion, the Apache worked after a bit of tweaking.

John Kainrath, K7JHK, has enjoyed ham radio both in the

U.S. and in Germany. John is of Austrian decent, and his wife Irene is from Germany, so they usually travel there each year to visit relatives. John has taken advantage of that to attend the Field Days put on by the German Amateur Radio Club during several of the visits there. The photo shows John with Mitch Wolfson, DJ0QN, (also K7DX). Mitch is the secretary of the German Amateur Radio Club and was John's link into Echo Link. John used his 432.850 MHz on his hand held to connect to Echo Link through Mitch's station, which was about five miles away.

You probably already know that Joe Brian, AB7VY, who hails from Australia, was a press photographer in the UK for an English newspaper on Fleet Street.

I was surprised to hear that Ken Peloquin, N7PHO, was an EMT. For six years he was in charge of the trauma unit at Brockton City Hospital in Massachusetts and did compressions, often holding a heart in his hand. He also was a mental health assistant at Taunton, Massachusetts for ten years.

Dick Baum, NS7A, who spent 37+ years with the Goodyear Corporation, invented an anti-collision computer for ships. The first one was built in 1962. Dick is also responsible for patents on radar and analog computer equipment.

The conclusion that can be made from the disclosed secrets of the past which have been revealed in the February and March issues of the ADAW is that most of our amateur radio operators have diverse backgrounds. Besides the public service they have done through amateur radio, many have been of service to their community in other ways. Many are technically skilled in areas besides electronics, and several show artistic talents. Amateur radio operators comprise a unique group.

Since the last issue of ADAW, the AARC has set the date for our 2010 hamfest. Hopefully this year we will experience a DRY and WIND-FREE hamfest on April 10 at the south parking lot of DeVry University.

With Field Day in mind, the club has purchased a new solar panel, and we will have a technical session at our February meeting concerning its amateur radio use. Our meetings are the second Thursday of each month at 7:30 P.M. at the Red Cross building one block north of Bethany Home Road on the northbound access road of I-17. Nonmembers who wish to attend a meeting should contact Gary, K7GH, at (602) 996-8148 at least a day before the meeting to satisfy the Red Cross security requirement.

At the January VE test session, all five applicants were successful in passing their exams. We offer our congratulations to them for their hard work in preparing for the exams.

Congratulations to John K7JP who got the CARL "Ham of the Year" award for 540 volunteer hours at W7ASC. That does not count the extra hours he has put in as CARL secretary. Nine "Certificates of Appreciation" and ASC Memberships were awarded to volunteers with more than 200 hours. An additional five memberships went to volunteers with 100 to 200 hours and ASC passes to five with 50 to 100 hours. We ended up with 51 active volunteers for 2009, a slight gain over 2008, but still short (excuse me while I skip over a bunch of other statistics). Basically, we need volunteers!

Dave W7PMD gave a talk on Batteries and battery technology. It was very informative, especially on Lithium cells and their characteristics. Shack improvements are moving, although slowly as ASC is putting their full effort into the "Green" and solar displays. We are still on the list to get the Digital clocks installed and for a do-over on the mural. We now have the Yaesu FT990 working at the West station, but not remotely as the interface is no longer manufactured. Steve WB4ZSC is looking into what we can do for a replacement. The meeting ended with Skip K7OAH winning the \$50 HRO door prize and the ASC shirt went to Andrea KE7OPV.

The following CARL Board of Directors were nominated and approved by the members:
 John K7JP, Bob KG7QJ, Larry KC0JON, Ray KE7FUM, Dave W7PMD, Tom, AD7PM, Roger W9NCQ, and Jordon KC7CWX. The officers will be appointed by the Board at the next BOD meeting.

W7ASC QSL Card

Old Pueblo Radio Club INTERMOD

President's Column

Despite the wet and somewhat cold weather, the Old Pueblo Radio Club held its monthly general meeting Wednesday, 10 February 2010. Among the attendees was John Kalmes, KC7LIB, a past president of the club. Welcome back.

Plans were begun for the annual swap meet to be held in October. The location has not yet been finalized, but the board hopes to tie this down by the end of this month. Several alternate sites are being surveyed, but the past site has worked reasonably well, and we may return to it again.

Bill Price, N7GUO, has offered his home and equipment for possible use on field day, and for the upcoming 160 meter contest.

The club is proposing to take on the building of some kit equipment at the monthly meetings. Bill and I will be looking for ideas. More on this later.

Speaking of equipment, George, N9IUK, has located the club's antenna analyzer and its instructions. Club members are free to check this instrument out to use on their own antennas.

Bill, N7GUO is doing a little house cleaning. As a result, we will be having a drawing for some free door prizes at the March meeting. First prize will be Bill's packet station. It is missing only a simply constructed wire harness. Members and guests are welcome to attend.

The treasurer has requested that I remind members that dues are payable at this time.

Hope to see everyone at the March meeting.

73,

Ron Kalish, N7SPW
President, OPRC
